

SITE INSTALLATIONS, SERVICING AND MAINTENANCE

Installations, servicing and maintenance support for marine environmental monitoring systems and equipment

KEY BENEFITS

- Any sensor, any location
- Trusted & experienced marine engineers
- Any size of project undertaken
- Worldwide capabilities
- Thorough testing, quality assured

Using our team of experienced field engineers, **we can install and maintain your sensors and monitoring equipment** no matter what the size or scale of your operations. Our professional team can undertake a wide range of services from site surveys and equipment or system installations, to geodetic levelling and ongoing servicing and maintenance.

We also have access to other experts/resources as required and can coordinate the work of commercial divers, mooring supplies, vessels for deployment and recovery, and electrical engineers.

We undertake:

- Site Surveys
- Factory Acceptance Tests / Commissioning / User Acceptance Tests
- Geodetic Levelling and Surveys
- Installations (Sensors, Systems and related equipment)
- Servicing and Maintenance
- Calibration / Recalibration
- Flexible, robust service from trusted marine engineers

We can help advise at any stage of your project and offer a FREE initial consultation and advice. Simply contact us.

With our help you can achieve:

- ✓ Reliable data
- ✓ Avoidance of component or equipment failure
- ✓ Maximised system uptime
- ✓ Reduced premature equipment replacement
- ✓ Improved situational awareness
- ✓ Heightened confidence in your systems and equipment
- ✓ Maximised return on investment

“We are very happy with the service level agreement ... we get the best of both worlds really, the nimble technical specialists at the end of the phone and delivering operationally critical sensing and information.”

R Bird, Peel Ports Group

Protect your investment in your marine assets and keep them delivering the data you need when you need it
